

NULOGY CONNECT SOLUTION

Frictionless Connectivity for Efficient, Collaborative Orchestration

**CONNECTED BUSINESSES ARE THE
ONES THAT WILL WIN THE FUTURE.**
NULOGY CONNECT ENABLES ROBUST,
SEAMLESS CONNECTIVITY WITH
YOUR OWN SYSTEMS AS WELL AS
YOUR CUSTOMERS' AS AN EASY AND
COST-EFFECTIVE WAY TO LEVEL UP
YOUR SERVICE, COMMUNICATION, AND
SPEED-TO-MARKET.

Stay Connected

Nulogy Connect helps your teams stay in sync and helps you collaborate better with your customers by enabling the seamless flow of data such as inventory and production information to your stakeholders. Nulogy Connect also automates and accelerates the delivery of operational data such as shipping, receiving, change orders, and billing data, effectively eliminating double entry and manual entry errors.

With over 20 years of domain expertise in integrating contract packaging and third-party logistics operations with their consumer goods customers, Nulogy is able to offer customers a highly configurable platform that can standardize data integration requirements as demanded by today's leading consumer goods companies.

HELPING YOUR BUSINESS STAY IN SYNC

To keep up with the speed of today's marketplace, your systems need to connect and communicate seamlessly. Nulogy Connect helps you lower costs, improve cash flow, and increase overall production efficiency by ensuring data flows seamlessly between your production, inventory, and business systems.

HELPING YOU BUILD STRONG PARTNERSHIPS

Nulogy Connect enables you to collaborate more effectively with your customers and trading partners by sharing accurate, real-time information, as well as business-critical data such as purchase orders, advance ship notices, production goods receipts, and more.

KEY BENEFITS

Save time and costs by leveraging Nulogy's simple, easy, and powerful integration capabilities

Easily integrate with your customers' systems to support real-time collaboration and synchronization, improving real-time response

Increase responsiveness and reduce delays through customized, real-time alerts and notifications

Increase productivity by using workflow automation to quickly and easily complete common repetitive tasks

Improve collaboration by sharing Production Orders, Material POs, Item Masters and BOMs, and Inventory transactions among customers and trading partners via a centralized, secure, and flexible integration hub

How It Works

INTEGRATION WITH CUSTOMER SYSTEM

Integrate inventory, material and order data with your customer's or vendor's ERP materials management, order management, and/or warehouse management modules.

CUSTOMER ERP

TYPICAL MODULES:

- Purchasing
- Materials Management
- WMS

INFORMATION EXCHANGED:

- Purchase Orders
- Vendor purchase orders
- Item master
- Bill of Materials
- Ship Orders
- Goods receipt
- SSCC level inventory transactions
- ASNs
- Adjustments and damages

VENDOR ERP

TYPICAL MODULES:

- Sales order
- WMS

INFORMATION EXCHANGED:

- Orders
- ASNs

INTEGRATION WITH INTERNAL SYSTEMS

Integrate with your internal financial or accounting systems, ERP, WMS, and BI data warehouse systems to track inventory, materials, orders, jobs and resources.

ERP

TYPE OF INFORMATION EXCHANGED:

- Job costs
- Purchased Inventory transactions

WMS

TYPE OF INFORMATION EXCHANGED:

- SSCC level inventory transactions (inbound/outbound)

BI DATA WAREHOUSE

TYPE OF INFORMATION EXCHANGED:

- BOM and Item Master
- Production and Profitability
- Vendor and Shipment Orders
- Inventory and movements

KEY FEATURES

- Leading API and EDI integration capabilities
- Powerful low-code integration mapping and configuration
- Hundreds of connectors for commonly used SaaS applications
- Universal HTTP connector for integration with any cloud-based application APIs
- Configurable email and SMS notifications
- Configurable workflow automation

TECHNICAL SPECIFICATIONS

- Real-time, scalable data validation, transformation and routing enable quick data integration regardless of data complexity or volume.
- Data-overload and failure-handling capabilities ensure business continuity and minimize the impact of system downtime on business partners.
- Supports strong security protocols, data integrity checking and guaranteed delivery.
- Flexible support for modern API integrations or legacy EDI integrations.
- Support for industry standard protocols such as REST, HTTPS, AS2, FTPS, SFTP. Supported data formats include JSON, XML, X12, EDIFACT, flat file.
- Audit/trails/tracking – the system is auditable and contains detailed logs of transactions as they move through Nulogy Connect.

With Nulogy Connect, optimize your operations with simple, powerful data connectivity to ensure your teams work in sync while collaborating with your customers at the speed of today's market.
