

Nulogy Demonstration

# Optimising Packing Operations with Nulogy

Presented by:  
Josephine Coombe, Chief Commercial Officer  
Jake Golden, Senior Solution Engineer  
26 February, 2025

# Agenda

1. Understanding your environment
2. About Nulogy
3. Solution Overview
4. Support and implementation
5. Next steps

# Our current understanding

- Nottingham based manufacturing plants
- Operations hampered by cumbersome manual and excel-based processes
- High and variable labour needs: opportunity to better manage costs and labour allocation
- Inventory and materials: opportunity to improve accuracy and visibility
- Exploring digitalisation to improve efficiency and scale up

# About Nulogy

Nulogy's SaaS-based Shop Floor solution helps contract packers and manufacturers deliver differentiated products to market more quickly, flexibly, profitably, and with less waste.

## GLOBAL REACH

## GLOBAL CUSTOMER BASE

## INDUSTRY ASSOCIATIONS

# Nulogy in Europe

KinaXia Logistics

# Nulogy is the Undisputed Category Leader in Co-pack/Kitting Software

The **ONLY** software **purpose-built for co-packing and VAS** operations on the market

# Partners in Long term Value

# Nulogy's Client Services

Nulogy's **Professional Services** team ensures that our solutions are implemented according to your business objectives and success criteria.

You'll have a dedicated **Customer Success Manager** who is your trusted advisor and advocate for continued success.

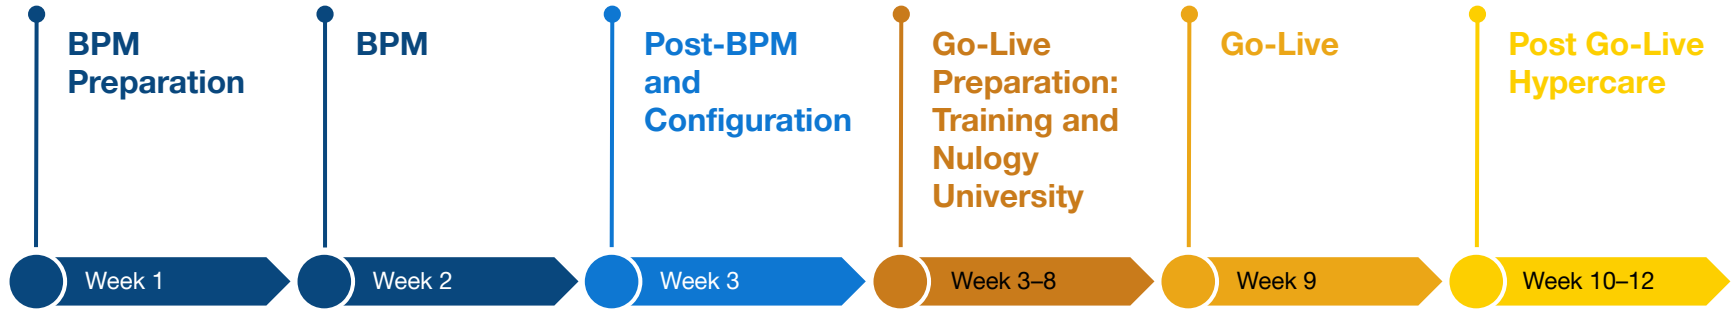

Nulogy's **Global Support** team offers immediate issue resolution on anything that keeps you from running at peak performance.

We provide **training and educational tools** to equip your team with best practices and enable proficiency within our solutions.

# Implementation Roll-Out

## Rapid Deployment and Investment in Change Management & Training

### Business Process Mapping (BPM)

Nulogy conducts an end-to-end “Quote to Ship” analysis for your business and operational workflows.

Nulogy and Client work together to design future state workflows leveraging the platform, based on Client’s requirements and Nulogy’s best practices

### Post BPM

Nulogy prepares post implementation workflow document

Nulogy University and the Nulogy Training environment are configured and released to users

### Pre-Go-Live

Data migration templates are completed

Hardware is procured and configured for Go-Live

Training is delivered through Nulogy University, remote instructor led training, and release of a finalised Standard Operating Procedure (SOP)

### Go-Live and Hypercare

Nulogy will lead additional hands on training for users

Following GL cut over, Nulogy provides continuing hands on support through stabilisation and hypercare

# Thank You
